Dear Extension Friends,

Part of our job in Extension is to measure the impacts of our programs, typically through online surveys. To those that took the time to provide feedback by participating in a survey this year, we thank you very much! The survey drawing winner this year is Debbie Clark.

Sincerely,

Alicia Lamborn
County Director / Horticulture Agent
UF/IFAS Extension Baker County

And the Winner of The Florida Gardener’s Handbook is....
Debbie Clark
Congratulations!

Pick up a FREE 2019 CALENDAR at the Baker County Extension Office!
Norfolk Island Pine for the Holidays and Beyond

Norfolk Island pine (Araucaria heterophylla) is a popular houseplant gift during the holidays. Often used as a small Christmas tree, these wonderful little trees can brighten your home long after the holidays end.

Not a Pine Tree?
Although we call them pines, these trees are not true pines; they are members of a pre-historic family of conifers. Norfolk Island, where this tree hails from, is located in the South Pacific between Australia, New Zealand, and New Caledonia.

While sold here in the states as tabletop Christmas trees, in their native habitat these plants can reach 200 feet tall with trunks that swell to 10 feet in diameter. In warm winter areas of Florida, these trees grow up to 80 feet tall, but are not hurricane tolerant.

Norfolk Island pine is slow growing, maybe reaching 5 to 8 feet in 10 years. Slow growth combined with the fact that these are tropical plants, makes them perfect as a houseplant or patio plant in North Florida.

How to Keep Them Happy Indoors
Indoors, these plants need bright light and humidity to thrive. As with all houseplants, avoid overwatering. Increase humidity by filling a saucer with water and rocks or gravel, then place the potted plant on top making sure the pot is not sitting directly in water. When you find the spot in your house with the right light for your plant, don’t forget to turn the plant every week or so to keep it growing straight and upright.

What is County & District Council?

A 4-H Council is an elected representative group of 4-H members who meet, discuss, plan, and assist in carrying out 4-H programs and activities in the interest of the total membership. The Council provides a link between local clubs or groups and County 4-H Programs, between County Programs and District 4-H Programs, and between District Programs and State 4-H Programs.

What this means is members from clubs represent their club in a larger group made up of representatives from other clubs. In the case of District Council, representatives from different counties come together. Our 4-H District is 5, and we are composed of Alachua, Baker, Bradford, Columbia, and Union counties.

Participation in a 4-H Council provides the means for the personal growth of 4-H members through citizenship and leadership activities. Teens are looking for leadership roles and are interested in returning something to 4-H. Council participation gives 4-H'ers the opportunity to exercise their leadership knowledge and be of valuable assistance to 4-H Programs.

Youth who participate in County Council could help with county-wide events like leading a community service project, helping with County Events, be a counselor for day and residential camps, and more! If you need community service hours, this is the club for you!

If you want to see what County Council or District Councils do, please meet with Mrs. Shaina. District Council is hosting a wreath making event and Holiday Party on December 10th, at the Columbia County Extension Office, at 6pm. Because of supplies & dinner, a $10 registration (for members age 11+) is required, go to https://bit.ly/2FGoFHR. Transportation for 5 youth can be provided.

4-H Clubs Need Help!

We need people to help teach subjects at club meetings. If you or someone you know is knowledgeable about chickens, rabbits, cows, or arts & crafts, please contact Shaina at the Extension Office at 259-3520.

4-H Club Meetings & Events

• New Time & Location! Cloverleaf Cloggers—Sanderson Community Center, Every Thursday 6-8pm
• Livestock Club—No meeting in December.
• Hearts for Horses—No meeting in December.
• District Council Meeting, December 10th, 6pm. Columbia County Extension Office.
Feeding Through The Winter

Old Man Winter has shown his face in North Florida recently, and as we progress into colder weather it is time to start winter feeding.

During colder months livestock need more feed in order to meet the demands of body heat production, typically this need is met with hay and sometimes grain.

When feeding hay make sure to keep it in a hay ring or hay feeder. This reduces significant hay waste and can make bales last longer, stretching your dollars.

Horse quality hay may be difficult to find as the winter goes on due to a poor hay season. Make sure you have your hay supply lined up from an individual producer or feed store, and be aware of other locations to purchase your hay in case your regular supplier runs out.

If feeding another supplemental feed like grain, be sure to acclimate animals to eating larger amounts of sugar & starch. Steadily increase the amount of grain being fed over a period of a few days to a week until desired total grain is met.

Always make sure that animals have fresh water and are staying hydrated. We notice issues, particularly colic in horses, during the winter because animals are less likely to drink really cold water. Poor hydration can cause digestive issues and more in our livestock. Provide warmed water occasionally and consider a de-icer for the tank.

Winter feeding is more cost effective if purchased in bulk. Explore options for bulk hay purchases, which can help guarantee a hay supply throughout the winter.

Hay rings help reduce waste and spoilage of hay. In rough hay seasons it is important to utilize every bit of a bale.

Overfilling hay rings can cause more waste, as animals can drag out more hay. Keep hay rings filled to the proper level or invest in a different style hay feeder.

Trough heaters can keep ice off of stock tanks and keep water warm which encourages animals to drink.
