PHILOSOPHY AND GOALS OF THE 4-H LIVESTOCK PROGRAM

“The purpose of the 4-H Livestock Program is to provide young people an opportunity to participate in a series of activities designed to improve citizenship, sportsmanship, character, competitive spirit, discipline, responsibility and livestock knowledge, while creating an atmosphere of personal development and awareness of life around us.”

The goals and implications of the above statement are life changing. Leadership does not anticipate that youth would progress at the same rate in all these objectives. However, given the proper motivation and guidance by the leaders, parents, and 4-H agent, there will be progressive improvements in the youth’s development. Simply having a youth recognize the opportunity for growth and personal potential is a significant accomplishment.

Most 4-H youth participating in a livestock project will already have an interest in the animal. It is leaderships’ responsibility to utilize this interest to accomplish the livestock project’s objectives through training and guidance.

The purpose of a livestock project, both market and non-market, is to further the education and development of the child.

There are more than 360 projects in 4-H, and all have the common goals of making better citizens of youth, increasing their knowledge in a subject area, enabling them to develop integrity, sportsmanship and cooperation along with leadership abilities. It is the goal of the 4-H Youth Development program to inspire youth to explore all their areas of interest.

It also should be noted that the Livestock Show and Sale is not the major objective of this program but merely the project’s conclusion. It must be understood that our first and most important objective in the 4-H program is the education and development of the child.

4-H Poultry Book

Introduction

This Project Record Book has been created specifically for 4-H members enrolled in a Poultry 4-H project. Keeping a record book is an important part of the project. It will help you set goals for the project year, record your accomplishments, and provides a place to keep important records on your poultry, waterfowl or game birds.

What is a 4-H project?

A project is a subject or topic that you learn about in 4-H. In this case, your project is Poultry. You learn about your project by attending club meetings and educational workshops, and working with adult leaders and other 4-H members. You can also learn from field trips and by participating in shows and competitions.

Why complete a record book?

A record book is not meant to be a chore. Instead, it is a way for you to learn about your project and gain experience in valuable skills such as setting goals, collecting and evaluating information, tracking costs and expenses, organization, and more.

Completing your 4-H Poultry Project Record Book

At the beginning of the 4-H year you should select one or more of your birds (e.g., your market poultry birds if you are completing the market poultry project) to be your 4-H project animal(s) for the year. Then begin recording all the relevant information on your animal(s) in your record book on a monthly basis. It is important to keep your record book up to date, so that completing it does not become a chore at the end of the year.

The purpose of youth animal projects is to achieve the following:

1. To acquire an understanding of animal production by preparing for, purchasing, caring for, and keeping records on one or more animals.
2. To be able to identify the type and grades of animals and employ efficient methods of marketing.
3. To understand the business aspects and economics of purchasing animals, feed, facilities, and equipment for an animal project.
4. To develop integrity, sportsmanship, and cooperation.
5. To develop leadership skills, build character, and assume citizenship responsibilities.

EQUIPMENT INVENTORY INSTRUCTIONS

Please read these instructions thoroughly before filling out the Equipment Inventory.

- List all equipment and assets you had or purchased at the beginning of the project year. During the year, you should list any new items you purchased for your project. (Note: This does not include feed or medication. Those will be documented separately.)
- If an item was purchased at or near the beginning of the project year, value should be purchase price. If an item is more than 1 year old, value should be less than original purchase (decrease value by 10% per year).

- Depreciation is the reduction in value of an item, due to the wear and tear it experiences over time. One example of this is a car. A new car may be worth \$25,000. However, as the car gets older and is driven more miles, the car is no longer worth the same amount. Five years later, your car may be worth only \$12,000.

- **Calculation Example**

- You purchased a \$300 chicken coop for the 2022-2023 project year. Its value at the beginning of the project would be \$300.
- However, due to normal wear and tear, at the end of the 2022-2023 project year your chicken coop's value has decreased, or depreciated, by 10%. Therefore, your depreciation value is \$30.00.

$$\$300.00 * .10 = \$30.00$$

- To calculate your end-of-year value you will need to subtract your depreciation value from your beginning of the year value. Therefore, the end-of-year value for your chicken coop is \$270.00 for the 2022-2023 project year.

$$\$300.00 - \$30.00 = \$270.00$$

- It's important to remember that for the 2023-2024 project year, the beginning value of your chicken coop will be \$270.00, and its value will continue to depreciate over the years. **Remember to always calculate your depreciation off of the original cost or value**

$$\$300.00 * .10 = \$30.00$$

$$\$270.00 - \$30.00 = \$240.00$$

PROJECT STORY OUTLINE

Make an outline for your project story before you begin writing. You may use the outline headings provided to write about your project. Complete sentences aren't necessary in an outline. You must complete an outline in order to receive full points. However, if you'd like to create an outline in a different format (word web, etc.) please feel free to do so and attach it in your record book in the proper location.

I. **Introduction (Introduce your story and capture the reader's interest)**

II. **Body (Complete a minimum of 2 boxes)**

a. **What did I learn?**

b. **What safety practices did I use?**

c. What improvements could I make?

d. What skills did I learn or improve?

III. Conclusion (Summarize your story and leave the reader with a thought or idea you'd like to share.)
