Lychee	<i>Litchi chinensis</i>	\$267	\$428	\$542
Mamey sapote	<i>Pouteria sapota</i>	\$255	\$405	\$511
Mango	<i>Mangifera indica</i>	\$285	\$490	\$665
Sapodilla	<i>Manilkara zapota</i>	\$525	\$789	\$925

These numbers can be used to report losses when trees die or are destroyed by natural disasters.

Tree year refers to how many years the tree has been in the ground. For example, a four-year-old tree would have been planted in the ground four years ago.

The reported tree values are based on the methodology outlined at the Agricultural Economics Extension website (<http://agecon.centers.ufl.edu/index.html>) Should you need any additional information or clarification please do not hesitate to contact us using the information provided below.

The use of trade names in this publication is solely for the purpose of providing specific information. UF/IFAS does not guarantee or warranty the products named, and references to them in this publication does not signify our approval to the exclusion of other products of suitable composition. Use all pesticides and tools safely. Read and follow directions on the manufacturer's label.
